DETAILED ACTION

Response to Arguments

- 1. Applicant's arguments, see page 12, filed 8/20/2007, with respect to claims 2, 10, and 12-17 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.
- 2. Applicant's arguments filed 8/20/2007 have been fully considered but they are not persuasive in regards to claims 1 and 4. Applicant argues that Tancevski fails to teach notifying receiver availability and transmission failure. Tancevski discloses the use of ACK/NACK in paragraph 27. An ACK message will indicate that a receiver has received the previous message and is now ready to receive more. A NACK will indicate that a transmission has failed. As applicant points out the ACK/NACK system of Tancevski is different, but in the broadest reasonable interpretation it does meet the limitation.

Claim Rejections - 35 USC § 102

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Tancevski (US 2006/0092958).
- 4. In regards to claim 1, Tancevski discloses a network comprising: a plurality of data channels (figure 2 element 24); a control channel (fig. 2.22); tokens which pass between nodes on the control channel (fig. 4.30); wherein tokens advertise availability of receivers at a destination node and notify a source when a transmission did not succeed (paragraph 27).

Application/Control Number: 10/602,145

Art Unit: 2616

5. In regards to claim 4, Tancevski discloses the network of claim 1, wherein each node of the network has fewer transmitters and receivers than data channels (Paragraph 27 indicates some or all stations are tunable to only a subset of the channels).

Allowable Subject Matter

- 6. Claims 12-21 are allowed.
- 7. Claims 2, 3, and 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kerri M. Rose whose telephone number is (571) 272-0542. The examiner can normally be reached on Monday through Thursday, 7:00 am - 4:30 pm.

Art Unit: 2616

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris H. To can be reached on (571) 272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
